Other Developers

Adr

I like seeing
your progress when
collaborating and
reusing items
[M26; C84]

I can grant access to
protected items
[C84]

Commenting makes
it easy to
understand code
[C84; Q35; K42; B53]

I can grant you access
[J19; C84]

We have to accommodate
time zone differences
[M26; B53]

Naming conventions help me understand what the code is doing
[C84; B53; K42]

It takes me some time to learn your code
[B53]

I only remember to Comment and Debug is
done after coding
[B53]

You must continue
where the other
developer left off
[M26]

I automatically approve
internal change requests
[T70]

Clients

ministrat
ors

We want things
standardized
[M26]

I like to get your
feedback often
[M26]

I provide application
requirements throughout
the project cycle and
report any errors
I find
[B53; Q35; T70]

I think having
access to the code
is helpful for you
[M26]

I will request changes
to protected items
[C84]

you can't have access
to all the data
[X97]

X I would like access
to the backend code
[X97]

We use the older version
because it supports
the way we do work
[K42]

I like working with
your service
[F66]

You provide
good support
[X97]

X I would like to reuse
code written with
other programs
[X97]

We make it easier
to manage user feedback
[B53]

X I don't like to enter
passwords repeatedly
[K42]

It's possible to
forget how to use the system
if not using the system for
extended periods
[K42]

We are constantly improving
our software
[F66]

I believe code
reuse is your best

User

X It's hard for me to export

validate feature

I take problems to
you when it's appropriate
[J19]

We assign you tasks
and tasks specifications
[J19; Q35]

X I don't know
who assigns
my tasks
[M26]

I would like you to
adopt my file structure
[F66]

You should update
me about your work
[B53]

You need to follow
the naming conventions
[M26; Q35; T70]

you should focus
on deadlines
[X97]

You must continue
where the other
developers left off
[M26]

When the project expands
split it up into modules
[J19]

I require your input
to correct
estimated times
[F66]

Keeping track of
hardcoded items is a
good practice
[Q35]

you have to use the
systems we provide
[X97; F66]

I don't report the
hours of non-appointed
tasks
[F66]

I estimate and monitor
the time of your task
[M26; F66]

We require you to use
certain software
[F66]

I don't log the
bug fixing time
[X97]

X I can't always meet
your time estimates
[M26; K42]

You should give more
time to projects with
higher priorities
[M26]

X you should log the time that
it takes to fix the bug
[X97]

I set the priority of the error logs
[B53]

Managers

on siz

eliminates the need to
inspect the work myself
[J19]

debugging is the most essential
part of developers process
[X97]

some items from one
project to another
[J19]

feature
[X97]

We provide initial
training
[K42;M26]

Even though I'm
afraid of crashing
I don't save because
it takes long
[J19]

I find repeated
bugs annoying
[Q35]

Visual representation
makes the code
easier to understand
[M26]

sier to share
names
ough IM
[F66]

x Runtime makes
me impatient
[Q35]

X I never understand
the error messages
[T70]

it's easy to develop appl
on the platform
[X97]

p physical
es of files
ding on size
[F66]

rrent work on
desktop
[B53]

X Naming conventions
can lead to
long names
[T70]

I like that your system
realizes references
have been updated
[K42; J19]

It is easy for us to see what the
versions are while working
on the project
[K42]

tain a file
e for emails
[F66]

y file structure
use it is
to manage
[F66]

Naming
conventions help
me understand what
the code is doing
[B53; K42; J19]

your platform is
faster and I can add
references easily
[X97]

X your platform
is not flexible
[X97]

X I would like versions to have
descriptions with their name
[K42; B53]

tes on page
at I work
efficiently
computer
[F66]

Commenting makes
it easy to
understand code
[X97, B53]

X I have to find a way to do
hierarchical lists
[X97]

I don't mind doing
workarounds if I know
you're fixing the bug
[Q35]

X I cannot accomplish certain
tasks unless I create
a work around
[X97]

nd annotate
ts depending
e of the file
[F66]

Queries should be
consistent with the
main entity
[F66]
