# 10. Automatic pattern recognition

Karen is creating a new web page which contains an add customer form.

Service Studio

File Name: Add Customer Form

! Template found.
Would you like to use it?

Yes   No

As she creates the new file and enters the name (Add Customer Form), the system realizes that there is a template that matches what Karen is trying to do, and makes the suggestion to Karen.

Service Studio

Start

Karen accepts the suggestion and the system creates the code needed for that web page.
